

Re: LCD Supply

25th January, 2001.

To Whom It May Concern:

Leaf Technologies Limited has been a long standing contract manufacturer to Lucent Technologies and other notable OEM's in the United Kingdom. It is critical to our business that we align ourselves with cost competitive/quality conscientious suppliers to support our business requirements. Over time, Far East Enterprises has proven to be a supplier of this calibre.

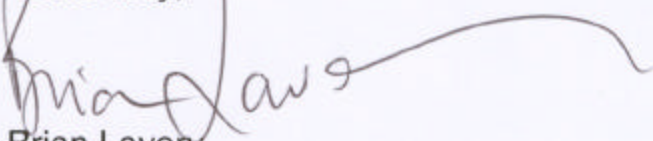

Far East Enterprises has been supplying STN-LCD technology required for our Lucent Technologies' contract for approx. 2 years, and to date, our relationship with Far East Enterprises has been without incident.

Furthermore, Far East Enterprises have created sizeable price incentives to the tune of an overall reduction of 20% over our previous supplier, resulting in annual savings of \$200,000 (total annual cost reduction over previous vendor for calendar year 2000).

In addition to the above, Far East Enterprises is very active in after-manufacturing services, currently providing a buffer stock/consignment program which has lead to a substantial decrease in inventory carrying costs and an enhanced response time to our JIT/BTO manufacturing programs.

It is with this, that I gladly and confidently recommend Far East Enterprises for those interested in seeking cost effective/quality-sensitive LCD technology alternatives.

Yours truly,

Brian Lavery
Procurement & Materials Manager.
